WORKSHEET 03.a

This Worksheet is for practicing correct shading technique by adding a shade and a shadow to the composition.

To do so, follow the chosen **Real Direction of Sunlight** (the diagonal line with the sign of Sun, defined through the corner of one of the objects) and its **Direction in Plan** (the horizontal arrow with a letter "p").

In this case, consider the sun rays parallel - the Real Direction of Sunlight will have the same orientation in the whole composition.

If in doubt, check the first page of this chapter (p. 32) to see the correct shading solution for this Worksheet.
